BILSTEIN®

The benchmark in technology and quality.

Foreword

A warm welcome to the world of BILSTEIN: a name which, for over 50 years now, has been synonymous with the highest level of quality in suspension technology. Countless national and international motor sports successes with BILSTEIN products at the wheel and "Best Brand" media accolades can all testify to this. As part of their serial development, the world's most renowned automotive brands place their trust in the innovation and quality of BILSTEIN suspension technology. As a result, we have been able to offer tailored shock absorbers and suspension technology for a number of cars over recent decades – whether for timely and efficient repairs, suspension optimisation, or the high demands of motor sports. Here, you can get a detailed insight into our world and range of products - but the only way you can truly experience BILSTEIN is to set off on your first journey and savour the feel of BILSTEIN products at the helm. We hope you enjoy it.

Your demands are what drive us.

**"I want to keep going
to the end when all the
others have given up."**

**"I want to arrive with
all out performance
supporting me."**

**„I want to keep
going to the end in style.
Wherever I go."**

**"When the road is your
destination, you want
pure driving enjoyment."**

Our innovation is a tradition.

August Bilstein

When the foundations were laid for the BILSTEIN innovation incubator in 1873, nobody could have anticipated the illustrious future that lay in front of the company. Despite starting out in the field of window fittings production, from 1928 onwards the emphasis was increasingly placed on automotive technology. In 1954 came the breakthrough: Hans Bilstein recognised the huge potential of the idea for a mono-tube gas pressure shock absorber developed by French researcher Bourcier de Carbon. We have since gone on to have a huge impact on the course of automotive history. For over 50 years, eminent brands such as Mercedes-Benz have been putting their trust in the strength of innovation and quality demonstrated by our products.

1873

First venture into the automotive industry

Progress through innovation

- 1873** Company founded as a manufacturer of window fittings
- 1927** First venture into the automotive industry and production of chrome-plated fenders
- 1929** Development of innovative car jacks
- 1954** Development of the first mono-tube gas pressure shock absorbers, following the De-Carbon principle
- 1957** Series production of mono-tube gas pressure shock absorbers for Mercedes-Benz
- 1961** BILSTEIN shock absorbers' first outing in Porsche Formula 1 racing cars
- 1983** Development of fully computerised shock absorbers for McLaren Formula 1 racing cars
- 1990** Development of the first electronically controlled semi-active damping systems
- 1996** Production of the first electronically controlled active damping systems
- 1999** Series production of the first active electronic air spring systems for the Mercedes-Benz S-Class (W220)
- 2004** Innovative DampMatic® for Mercedes-Benz and DampTronic® for Porsche launched onto the market
- 2005** Series production of innovative air spring systems for the Mercedes-Benz S-Class (W221)
- 2006** The BILSTEIN B16 PSS 10 adjustment system sets new benchmarks
- 2007** Introduction of the innovative electronic BILSTEIN B16 ridecontrol® adjustment system
- 2008** Introduction of the DampTronic system in the Jaguar XK
- 2009** Series production of the innovative lift system for the front axle of Porsche 911 GT3 models
- 2010** Innovative DampTronic introduced in the Jaguar XJ

**20,832 kilometers on the grünen Hölle: lik
to a Hamburg – Munich trip every day for a**

e subjecting a suspension year, only faster!

Some combinations are simply unbeatable. Take, for example, the “Genius on Wheels” plus the “grünen Hölle”: Walter Röhrl on the Nordschleife of the Nürburgring. There’s no better combination for putting a car’s suspension through its paces. Why? This kind of devilish testing programme – combining the merciless Eifel mountain range with one of the most skilful rally drivers of all time – soon separates the good suspensions from the perfect ones. What’s more, this is the minimum requirement prescribed by all of our test engineers – whether it takes place on the Nürburgring itself or the test track in Papenburg. Because we know you won’t settle for anything less than perfection.

All of them have two things in common: their innate driving ability that makes them

There's no future without a past. Take Formula 1 champions like Niki Lauda and Alain Prost, 24-hour winners such as Jacky Ickx and Hans-Joachim Stuck, rally champions like Walter Röhrl and DTM champions like Bernd Schneider. All of them have two things in common: their innate driving ability that makes them unique, and the perfect equipment. And for all of them, the biggest success stories have happened with BILSTEIN suspensions. For over 40 years, we have been right by the side of international motor sports, offering innovative technology such as threaded ride height adjustable kits, gas pressure technology, Upside-Down technology and parallel damping adjustment. Our experience and commitment equips every ambitious racing driver with the right tools for success, at all levels, in all of our roles – whether acting as the equipment manufacturer for the HWA team of the DTM or for the Land Porsche in the VLN – and on every track around the world.

unique, and perfect equipment.

When it comes to driving enjoyment, the world's most renowned automotive manufacturers place their confidence in just one name: BILSTEIN. The legendary driving characteristics demonstrated by such cars as the Porsche 911, Mercedes-Benz S-Class, Bugatti Veyron, Audi R8, Nissan GT-R, and many more, stem from the innovation and experience of our engineers. As a serial development partner, we provide not only shock absorbers, springs and stabilisers, but also unrivalled knowledge garnered from our success in motor sports. Armed with this know-how, we can offer high-quality series production and spare parts for virtually every vehicle model – so you can enjoy that unique BILSTEIN driving experience in your own car too.

There's nothing we can't enhance. That goes for **individuality** too.

We share a motto in common with the world's best-known motor vehicle tuners: Making good even better. That's why we support all the big names – from AC Schnitzer and BRABUS, right through to TechArt – in their endeavours to offer you the ultimate in individual vehicle settings and excellent driving dynamics. It's not just our level of competence in terms of high-tech quality and sportiness that ensures this, but also our meticulous and comprehensive testing programme on the toughest of courses, such as the Nürburgring. Because we know that we'll gladly go through hell to give you a heavenly driving experience!

CARGRAPHIC//CARLSSON//**

We don't see old bangers – only classics.

BMW 2002 tii, Ford Escort RS 2000, Opel Kadett GTE, VW Golf GTI. Legends in automotive history – and in motor sports. Never before has there been such enthusiasm for cars from decades gone by. With this in mind, we're constantly expanding our range to accommodate these classics. In addition to high-quality universal spare parts featuring the latest technology, we also offer high-performance shock absorbers for sport driving and true motor sports/tailored suspensions for the pride and joy in your garage. Because every car is only as young as it drives.

Please request
our classic
catalogue as well!

Even when things are rough, we'll quickly get you on the right track.

Where driving is concerned, there is always one thing that matters: staying on track. Even when you're off the beaten one. It's also our off-road components that benefit from our unrivalled knowledge gained from over 40 years of success in motor sports, coupled with our competence as an industry partner to the world's most renowned automotive brands. As such, for many years now BILSTEIN has gained success in equipping numerous teams in the Baja 500 and 1000 races with BILSTEIN products. Particularly on rough terrain, shock absorbers must be able to withstand extreme loads while at the same time offering maximum traction. So there's no need to place your trust in tarmac capability alone – you can rely on our extremely finely-tuned technology, tested on the world's toughest runs, too.

High performance: a question of the right approach

For that special driving experience, you need a combination of expertise and an exceptional car. In our development department, we have brought these qualities together in unparalleled fashion. Here, our engineers construct tailored suspension solutions for top-class cars such as the Lotus Elise, Wiesmann, Bugatti Veyron, Mitsubishi Evo X and many more. With their help, you can live out your driving dreams and achieve a limitless level of driving enjoyment.

We have the right absorber for every situation.

As one of the world's leading specialists in the field of shock absorbers, we feel at home on any type of route. Whether it's a race track, off-road terrain, a rally route or an everyday street, our experts can find the right technical solutions for any project and rise to other challenges involving vibration damping too – even when these are on a larger scale, such as constructing Germany's longest car bridge from the mainland to the Baltic Sea island of Rügen, or a heavier one, like creating armoured limousines. The engineers in our "Kunden-sonderwunsch" ("Special Customer Requirements") department will fulfil any wish and ensure that you can have the BILSTEIN driving experience and technology wherever you go. Don't settle for standard: go for **BILSTEIN** technology.

BILSTEIN Original Equipment

The world's foremost automotive brands put their confidence in our quality. Why? Because we develop and series-produce suspension components in collaboration with our partners from the automotive industry. By placing your trust in our experience too, you'll be opting for the BILSTEIN driving experience when you exchange your suspension components.

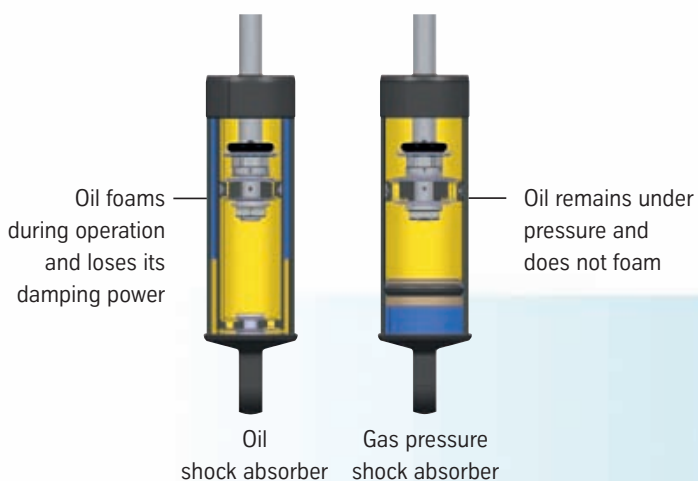

- Technology transfer from original equipment manufacturing and motor sports
- Expert knowledge of the world's most renowned brands, such as Mercedes-Benz, Porsche, BMW, Audi, Bugatti, Ferrari, Lotus, Jaguar and many more
- Comprehensive product range
- High market coverage and availability

BILSTEIN gas pressure technology

Over time, the mono-tube gas pressure technology developed by BILSTEIN has established itself as a standard in automotive construction. This technology involves keeping the oil in the absorber under pressure, which prevents it from foaming when temperatures and loads are increasing. As a result, full damping power is retained even when the system is placed under extreme stress, a feature that can be observed in the self-lowering piston.

- Ensures a high level of traction and more precise handling
- A must-have for powerful sport suspensions
- Added safety in all dynamic driving situations

BILSTEIN mono-tube/Upside-Down technology

The original and best: The original mono-tube gas pressure shock absorbers bore the BILSTEIN name, and we're still responsible for producing the best there is. BILSTEIN's mono-tube technology is the number-one choice in motor sports and series-production sports cars: no other type gives engineers the same freedom to choose the perfect installation location or position (e.g. Upside-Down technology).

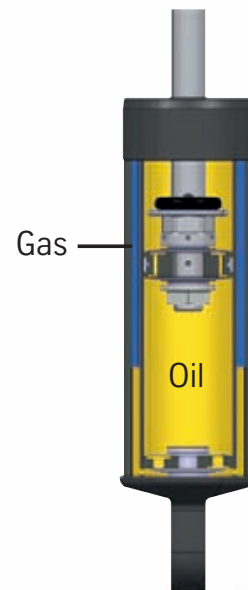

- Large effective surface on the working piston creates increased damping power and better handling
- Improved dissipation of thermal energy outwards enables a consistently high level of absorber performance
- Sturdy structure for added safety in Upside-Down technology

Twin-tube technology

The proven technology of a twin-tube absorber is applied in the vast majority of all vehicles. BILSTEIN's twin-tube absorbers, featuring "original equipment manufacturer" quality that has undergone rigorous testing, offer a marked improvement in driving characteristics with universal spare parts replaced in a timely and efficient manner.

- Oil or gas pressure technology
- Only tested, OEM quality is provided
- A favourably priced alternative at the highest level
- Technology transfer from series production

BILSTEIN lowering at the highest level.

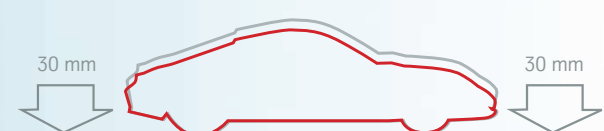

When it comes to lowering, not only must the vehicle's character be kept in mind, but the driver's too. A multitude of tests involving a wide variety of equipment helps our test engineers determine what the perfect lowering height should be. During this process, we consider aerodynamics, residual spring travel, driving characteristics, comfort, suitability for everyday use, behaviour in limited applications, and aesthetics. This gives rise to our three tenets of lowering.

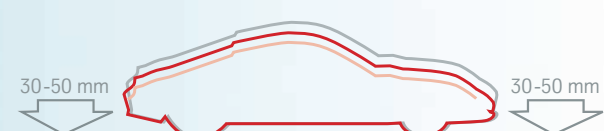

Wedge-shaped suspensions involve lowering of approx. 60 mm at the front axle and approx. 40 mm at the rear axle. This creates a sporty appearance which packs a huge visual punch.

With uniform lowering, the entire vehicle is lowered by approx. 30 mm. This accentuates the sporty appearance and emphasises the driving dynamics, without compromising on comfort and or spring travel.

The threaded ride height adjustable kit enables variable and uniform lowering by approx. 30-50 mm, allowing you to create your own personal balance of sportiness and comfort.

The perfect balance in no time at all.

BILSTEIN round threads

To ensure that you can fine-tune your vehicle exactly how you want it, our threaded ride height adjustable kits are easy to adjust – even when they're installed. Allowing you to find the perfect balance for your vehicle.

- The special thread has no sharp edges that could be open to aggressive environmental influences
- The secured aluminium spring plates ensure the utmost level of safety
- The right hook spanners are provided in the kit

BILSTEIN-Triple-C-Technology®

Our 3-layer coating system, developed especially with threaded ride height adjustable kits in mind, guarantees high-quality, enduring corrosion protection.

Coating 1: The special zinc alloy ensures excellent adherence to the base material, and forms the basis for long-lasting corrosion protection.

Coating 2: The middle coating transforms the zinc layer into a closed-formation, homogenous surface.

Coating 3: Not only is the top coat aesthetically pleasing, it also provides additional, long-term protection against mechanical wear and corrosion. Endurance tests to DIN 50021 SS also testify to this: for our material, being subjected to salt spray for over 600 hours is like water off a duck's back – compare that with the 418 hours boasted by stainless steel.

As individual as you are.

+/-20

Threaded body adjustable range

Just as no two vehicles are the same, each driver has their own unique style too. As a result, our threaded ride height adjustable kits even enable you to alter the height of your vehicle when they are installed.

- Spring plates and lock nuts made from a special aluminium alloy ensure maximum stability at a minimum weight
- Specially developed round threads and coating technology for easy adjustment by up to 20 mm; with German TÜV certificate
- Perfect pre-tensioning of sport springs made from highly durable material, at each setting and in every situation, for solid driving characteristics

The perfect settings for every setting.

It's all about the setting

Take the children to school in the morning, go to the shops in convenience and comfort in the afternoon – and get the most out of every curve in the road in between. For drivers who don't want to compromise on comfort or sportiness, our engineers have developed the perfect technology.

- Characteristic curve pairs given a multitude of road tests
- Parallel settings in rebound and compression cycles, for balanced driving characteristics
- Driving characteristics settings that suit individual needs perfectly

PSS 9/10

- 9/10 settings for parallel damping adjustment
- Option of changing the settings while kit is installed, by simply turning the adjustment wheel on the absorber

ridecontrol®

- An exclusive system that enables settings to be made by means of pushbutton inside the car/or on the dashboard
- Lightning-quick switching from convenient “normal” mode to high-powered “sport” setting

SOFT/COMFORT

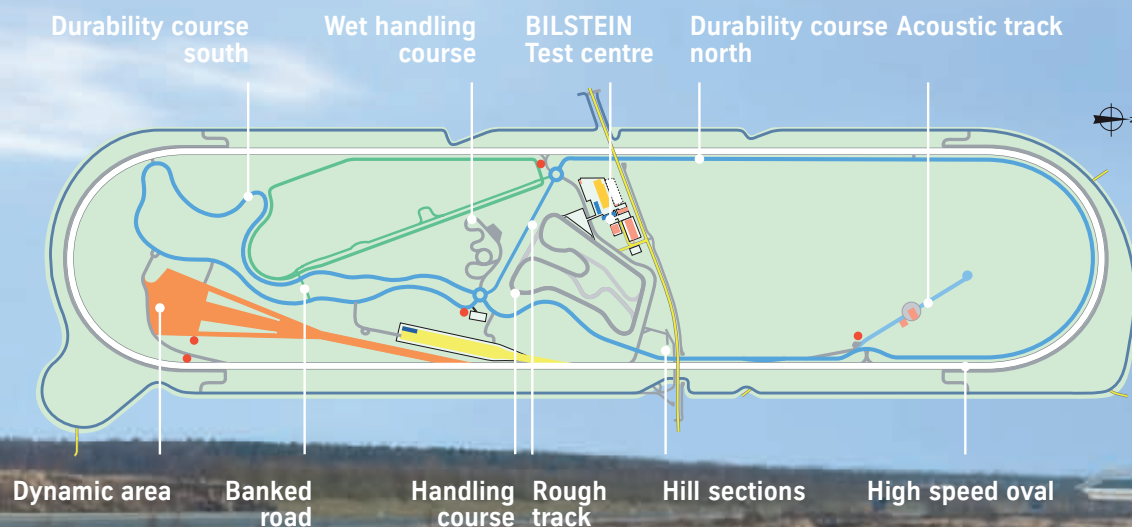

HARD/SPORT

You can never get enough of some good things. Like **experience**, for example.

Road-tested by **BILSTEIN**

To achieve that celebrated BILSTEIN driving experience, our BILSTEIN engineers rely on not only technology that is truly at the cutting edge, but also something that has withstood the test of time: how it feels to the driver. As a result, all of our high-performance absorbers, as well as our sport suspensions and threaded ride height adjustable kits, undergo a rigorous testing programme. On the Nürburgring and in our own test centre at the Papenburg test track, our drivers test how balanced the driving characteristics of various vehicles are in a variety of different driving situations. Only when they have passed this programme of tests with distinction are they allowed to bear the BILSTEIN name. This way, we can guarantee that celebrated BILSTEIN driving experience.

ATP Automotive Testing Papenburg

BILSTEIN-TECHNOLOGY *tested on*
NÜRBURGRING-NORDSCHLEIFE

The complete portfolio: Find the right product range for every requirement.

BILSTEIN B1–B4 **universal spare parts**

The BILSTEIN technology for practically every type of vehicle. With our “black beauties” – our range of universal spare parts – every driver can find the right suspension components, no matter what their budget. Naturally, these feature high OEM quality and offer the full BILSTEIN experience.

BILSTEIN B6–B8 **high-performance shock absorbers**

Anyone who has experienced our high-performance shock absorbers knows how much more powerful their vehicle can be. Whether you're engaged in sporting pursuits or frequently driving with heavy loads, BILSTEIN's “yellow range” will take your vehicle further than you ever thought possible.

BILSTEIN B10–B16 sport suspensions

Experience a new dimension in sportiness with BILSTEIN's sport suspensions and threaded ride height adjustable kits. With an individual appearance, a tailored approach and driving characteristics that can be moulded to suit your demands, you can enjoy every street, every curve and every metre of tarmac.

BILSTEIN ridecontrol® & DampTronic® electronic suspensions

Our electronic suspensions offer individuality at the touch of a button. Top-class technology for all those for whom compromise isn't an option – either in life or when driving. Simply touch a button to switch from a comfort setting to a sport one – and back again – in a matter of seconds.

The foundation of that special driving experience: universal spare parts

Volkswagen Aktiengesellschaft

BILSTEIN B1

Perfectly tailored accessories.

Support bearing

Mounting kit

Any shock absorber is only as good as the equipment around it. So when you're replacing shock absorbers, make sure you have the right service parts. Replacing bump stops and dust tubes is an absolute must.

The product benefits at a glance:

- All components designed to suit our BILSTEIN shock absorbers, down to the last detail
- Wide range of support bearings for almost every type of car
- Original BILSTEIN service parts with the high level of OEM quality that is expected from us

BILSTEIN B2

This is how simple quality can be.

OE

Our BILSTEIN B2 oil dampers are cost-effective alternatives for timely and efficient repair work.

The product benefits at a glance:

- Only, tested OEM quality is provided
- A favourably priced alternative at the highest level
- Technology transfer from series production

BILSTEIN B3 If you're looking for quality, look no further.

By choosing BILSTEIN springs, you're backing an uncontested champion: a successful motor sports supplier and a leading original equipment manufacturer of automotive springs.

The product benefits at a glance:

- Innovative technical designs, such as Pigtail ends, Minibloc forms and central force design
- High-quality chrome vanadium or chrome silicone steel for an extremely high level of break resistance
- Seated after forming process to prevent heat losses
- Careful surface compression and coating for a long service life
- Uncompromising OEM quality

BILSTEIN B4

Power under pressure.

The original and best: For over 50 years now, the original mono-tube gas pressure shock absorbers have come from their founding source – BILSTEIN – and used in practically every car model of recent decades.

The product benefits at a glance:

- Constant damping power under any load
- High power reserves for maximum safety
- Drive as though it's the first time, every time
- High OEM quality
- BILSTEIN gas pressure technology

BILSTEIN B4 air suspension modules

Working together with Mercedes-Benz, our engineers have developed a top-of-the-range suspension for top-of-the-range models: the air suspension system. The Mercedes-Benz S-Class (W220/C215) has this system to thank for its famed driving comfort – not to mention the fact that it is one of the world's first series production vehicles to be equipped with active springs and absorbers.

The product benefits at a glance:

- High OEM quality
- BILSTEIN gas pressure technology
- Lightning-quick reactions to road and vehicle conditions
- Excellent comfort and perfect driving characteristics

When performance is everything: high-performance shock absorbers

BILSTEIN B6

Performance you can feel.

If you expect more damping power from your shock absorber – even under load – but don't want to opt for an all-out sports model, the BILSTEIN B6 is the ideal solution.

The product benefits at a glance:

- Increased power reserves and service life, even when pulling transporters and trailers or during frequent journeys with loads
- Optimum adhesion and enhanced lane change stability in both day-to-day and extreme situations
- Marked improvement in safety and performance without additional spring changes (lowering)
- BILSTEIN gas pressure technology
- BILSTEIN mono-tube/Upside-Down technology, made in Germany
- Road and track tested by BILSTEIN for fine tuning
- No German TÜV registration required

BILSTEIN-TECHNOLOGY tested on
NÜRBURGRING-NORDSCHLEIFE

Off-road

For off-road vehicles, we offer a version of the BILSTEIN B6 that is adapted to special requirements. The precise settings reduce uncontrolled movements by the high structure and increase steering precision and the suspension's load carrying capacity, as well as guaranteeing more vehicle control and, therefore, safer handling and better traction.

BILSTEIN B8

Performance you can feel and see.

What lowering or sport springs are to aesthetics, BILSTEIN B8 is to performance!

The product benefits at a glance:

- Shortened high-performance shock absorbers for virtually every lowering spring set and series production sport vehicles
- Sports settings with high level of comfort
- Precision handling and optimised vehicle control
- BILSTEIN gas pressure technology
- BILSTEIN mono-tube/Upside-Down technology, made in Germany
- Road and track tested by BILSTEIN for fine tuning

BILSTEIN-TECHNOLOGY *tested on*
NÜRBURGRING-NORDSCHLEIFE

BILSTEIN B8 off-road **Taking performance to the next level.**

The ideal shock absorber for increased ground clearance and optimum adhesion. The freedom to find enjoyment off the beaten track.

A new dimensions in sportiness: sport suspensions and threaded ride height

adjustable kits

BILSTEIN B10

Make a real impression.

Impress others with a dynamic, wedge-shaped appearance – and be impressed by superior handling and a sensational price/performance ratio.

The product benefits at a glance:

- Approx. 60 mm front and approx. 40 mm rear lowering for an eye-catching, wedge-shaped appearance
- Improved driving dynamics, sportiness and performance
- More safety and lane change stability for more driving enjoyment
- Shortened Rebound gas pressure shock absorbers
- Progressive lowering springs adapted precisely to suit the shock absorbers
- Quality sport springs made from highly durable material
- German TÜV certificate

BILSTEIN B12

Build your own sports car.

NEW FROM 01/01/2011

If you're looking for the perfect combination of sporty dynamics, a superior appearance and high performance, you're on exactly the right track with this sport suspension.

The product benefits at a glance:

- Precise responses, excellent driving dynamics and added safety
- Uniform lowering of approx. 30 mm
- Quality sport springs made from highly durable material
- Springs and absorbers road-tested by BILSTEIN engineers and fine-tuned to complement one another perfectly
- BILSTEIN gas pressure technology
- BILSTEIN mono-tube/Upside-Down technology, made in Germany
- German TÜV certificate

BILSTEIN-TECHNOLOGY tested on
NÜRBURGRING-NORDSCHLEIFE

BILSTEIN B14

Sport makes you flexible.

With the BILSTEIN B14 threaded ride height adjustable kit, we're bringing technology from the race track onto the street.

The product benefits at a glance:

- Threaded body adjustable range of 20 mm at both axles, while installed
- Lowering of approx. 30-50 mm at front and rear
- Road-tested by BILSTEIN under motor sports conditions and fine-tuned
- Spring plates and lock nuts made from a special aluminium alloy
- Surface coating using Triple-C-Technology® for long-lasting corrosion resistance
- Round threads for ease of adjustment
- Quality sport springs made from highly durable material
- BILSTEIN gas pressure technology
- BILSTEIN mono-tube/Upside-Down technology, made in Germany
- German TÜV certificate

BILSTEIN-TECHNOLOGY tested on

BILSTEIN B16

Driving enjoyment – it's all about the setting

The new power class created by BILSTEIN engineers aims to achieve the ultimate in driving enjoyment based on individual requirements.

The product benefits at a glance:

- 9/10 characteristic curve pairs can be selected by adjustment wheel while installed
- Threaded body adjustable range of 20 mm at both axles while installed
- Individual settings ranging from extreme sportiness right up to the highest level of driving comfort
- Lowering of approx. 30-50 mm at front and rear
- Road-tested by BILSTEIN under motor sports conditions and fine-tuned
- Spring plates and lock nuts made from a special aluminium alloy
- Surface coating using Triple-C-Technology® for long-lasting corrosion resistance
- Round threads for ease of adjustment
- Quality sport springs made from highly durable material
- BILSTEIN gas pressure technology
- BILSTEIN mono-tube/Upside-Down technology, made in Germany
- German TÜV certificate

Additional product benefit BILSTEIN B16 CSC:

- 100 different characteristic curve pairs via 2 adjustment wheels (for rebound and compression cycles) when installed

BILSTEIN-TECHNOLOGY tested on

The benchmark in sportiness and comfort: electronic suspensions.

BILSTEIN B16 ridecontrol®

Sportiness at the touch of a button.

BILSTEIN-TECHNOLOGY *tested on*
NÜRBURGRING-NORDSCHLEIFE

In the blink of an eye, you can switch the suspension setting from “comfort” to “sport” mid-journey by simply touching a button in the cockpit.

The product benefits at a glance:

- “Comfort” mode creates smooth compensation for uneven surfaces
- “Sport” mode for excellent driving dynamics and maximum power reserves in all situations
- Illuminated operator button for controlling settings
- Threaded body adjustable range of 20 mm at both axles, while installed
- Lowering of approx. 30-50 mm at front and rear
- Road-tested by BILSTEIN under motor sports conditions and fine-tuned
- Spring plates and lock nuts made from a special aluminium alloy
- Surface coating using Triple-C-Technology® for long-lasting corrosion resistance
- Round threads for ease of adjustment
- Quality sport springs made from highly durable material
- BILSTEIN gas pressure technology
- BILSTEIN mono-tube/Upside-Down technology, made in Germany
- German TÜV certificate

BILSTEIN B16 DampTronic®

Dynamics without compromise.

An exclusive power class for exclusive cars: Porsche or Nissan GT-R owners, who have already chosen to experience the pleasure of a groundbreaking active suspension (in the case of the Nissan GT-R, a series), can now get better acquainted with this individual solution.

The product benefits at a glance:

- Perfectly adapted to suit series-production electronic adjustment system
- Superior driving dynamics with three setting levels
- Ability to switch rapidly from comfortable, everyday mode to sporty setting for journeys across rural roads and right up to a racing setting for championship sport
- Threaded body adjustable range of 20 mm at both axles, while installed
- Lowering of approx. 30-50 mm at front and rear
- Road-tested by BILSTEIN under motor sports conditions and fine-tuned
- Spring plates and lock nuts made from a special aluminium alloy
- Surface coating using Triple-C-Technology® for long-lasting corrosion resistance
- Round threads for ease of adjustment
- Quality sport springs made from highly durable material
- BILSTEIN gas pressure technology
- BILSTEIN mono-tube/Upside-Down technology, made in Germany

	11/04 - 176 - 228 kW			
B8	2.7, 2.9, S 3.2, S 3.4	35-122208	35-122210	without PASM
	11/04 - 176 - 228 kW			

 Product range
 Vehicle manufacturer
 Vehicle type and model
 Year
 Engine
 Part Number
 Front axle
 Type of mounting
 Rear axle
 Note

New BILSTEIN product numbers

BILSTEIN is introducing a new numbering system on 01/01/2011.

The new product numbers comprise numerical digits in the following format: XX-XXXXXX.

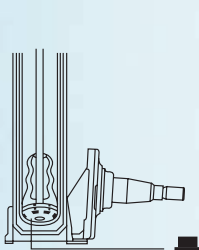

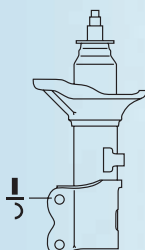

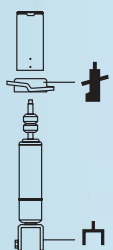

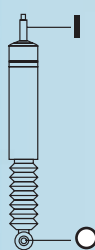

Type of fastening

e.g. pin top / eye bottom

Top mounting

Lower mounting

 Eye

 Base piece

 McPherson strut

 Yoke

 Clip

 Pin

 Special version

 Front left

 Rear right

VA Front axle

 Front right

 Accessory

HA Rear axle

 Rear left

 Steering damper

Motor sports-/individual suspensions

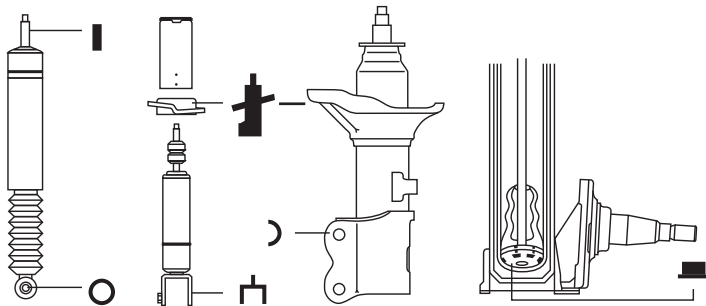

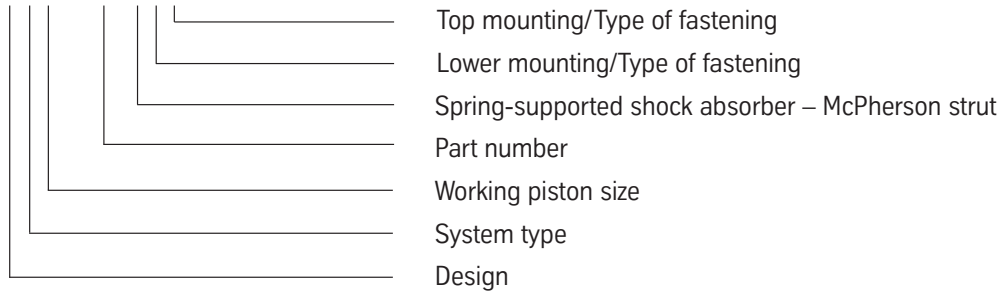

Volkswagen Aktiengesellschaft

Shock absorber name

e.g.: V E 3 - 4178 F S L

Design

- B** Shock absorber
- P** Cartridge
- R** Repair insert
- S** Sports kit
- V** Front/rear axle strut

Systemart

- E** Mono-tube system
- M** Manually adjustable
- N** Twin-tube system

Size

- 1** Ø 22 mm (B 22 -)
- 2** Ø 30 mm (P 30 -)
- 3** Ø 36 mm (V 36 -)
- 4** Ø 40 mm
- 5** Ø 46 mm (B 46 -)
- 6** Ø 60 mm (B 60 -)
- 7** Ø 32 mm (V 32 -)

Type of fastening

- F** Spring-supported shock absorber / McPherson strut
- S** Pin
- A** Eye
- G** Yoke
- L** Clip
- B** Base piece
- Y** Stub axle
- X** Special version

Notes

- 0)** Manufactured to order, not always in stock!
- R)** Repair insert
- 7)** With spherical joints
- 38)** Damping force at 0,26 m/s or 0,39 m/s
- 40)** Thread M10
- 51)** With additional grooves
- 54)** On consignment
- 61)** With 50 mm chrome tube
- 79)** For the vehicles with front struts only
- 81)** Except mounting parts
- 129)** Incl. thread
- 132)** Except Caravan
- 133)** Not EVO
- 134)** Incl. Facelift 1997
- 135)** With damping force adjustment
- 137)** Ø 40
- 138)** Ø 41

Order instructions

All orders are accepted subject to our delivery and payment terms. All information is subject to change without prior notice. Reproduction, in whole or in part, is not permitted without consent.

All competition shock absorbers with heim joints top and bottom!

Einstellungen/settings MSP

z. B.: 225/85

Dämpfkkräfte von 2250 N in der Zugstufe und 850 N in der Druckstufe bei einer Geschwindigkeit von 0,52 m/s

f. ex.: 225/85

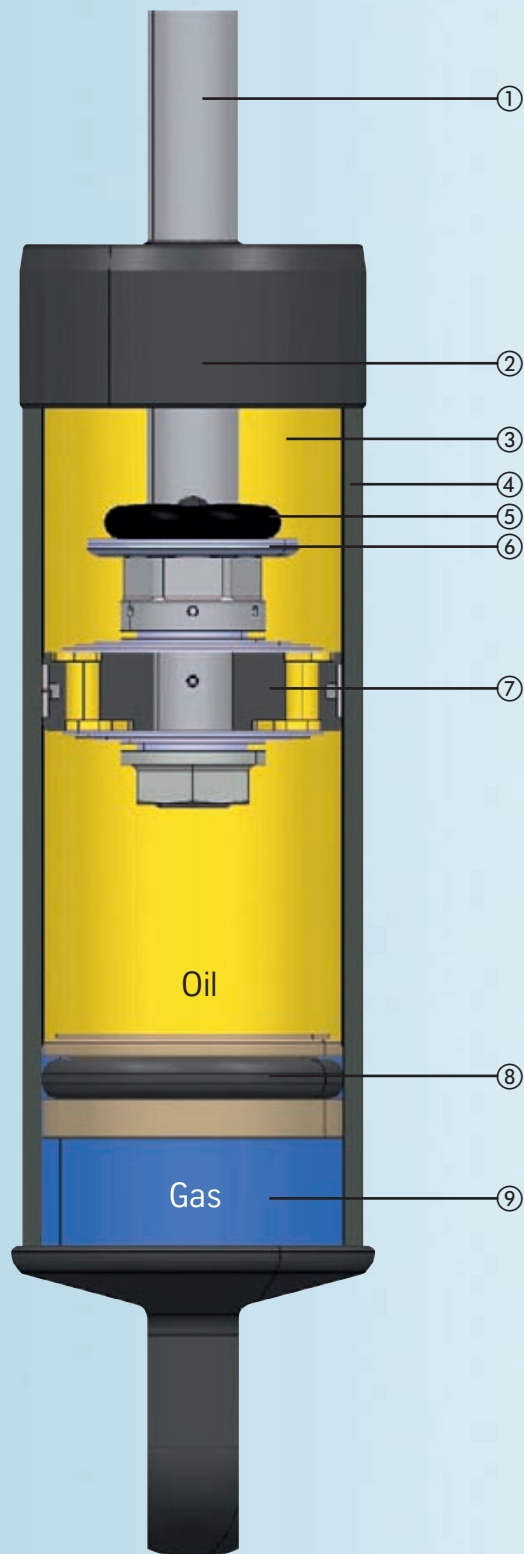

Damping force about 2250 N rebound/850 N compression at velocity of 0.52 m/s

No more Limits. Motor sports/individual suspensions.

Working principle: shock absorbers for individual suspension.

- ① Piston rod: Hard chrome-plated with oscillating finish grinding – higher stability against lateral forces, minimised friction
- ② Teflon-coated piston rod guide with super-elastic high-pressure seals – zero-play guidance throughout entire service life
- ③ Work chamber filled with oil – minimum possible oil quantity – good response rates
- ④ Shock absorber pipe - generous surface dimensions – good heat dissipation
- ⑤ Rebound stop
- ⑥ Brake
- ⑦ Generous and effective piston area – low working pressures at high forces – low damping force hysteresis
- ⑧ Dividing piston: Can be relied upon to separate oil and gas throughout entire service life
- ⑨ Gas chamber – volume compensation, temperature compensation and support of compression forces – no damping force lost through cavitation erosion

Design options

The BILSTEIN mono-tube shock absorber is a closed system and functions in every installation position. This offers special advantages in restricted space. The weight of the unsprung masses in vehicles can also be reduced by fitting the piston rod to the axle support.

Examples for types of fitting and installation positions

Eye – Eye

For eye fitting, different types of rubber/metal connection are available.

Pin – Pin

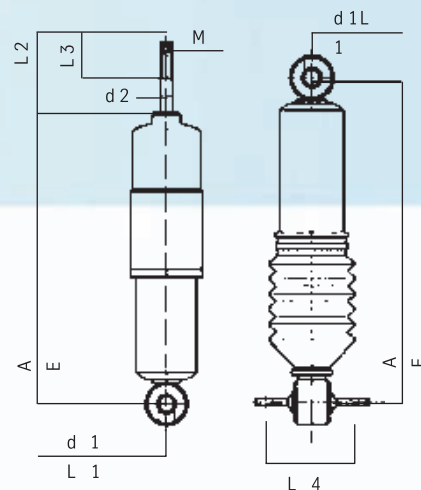

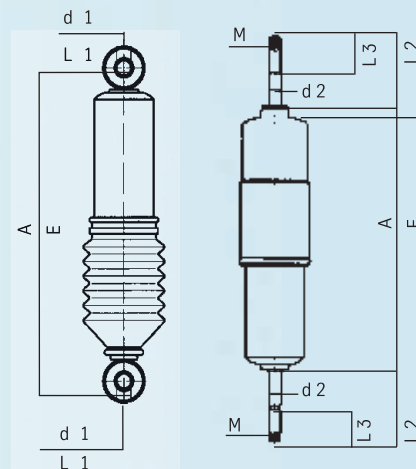

For pin fitting, different diameters and types of thread are available.

Alternative

Other types of fitting version can be designed; e.g. eye-pin or pin-eye.

Please use the experience of BILSTEIN specialists to define the design.

- d1 Bush ID
- d2 Diameter of pin
- A Extended length
- E compressed length
- L1 Length of bush
- L2 Length of pin
- L3 Length of thread
- L4 Hole clearance
- M Thread

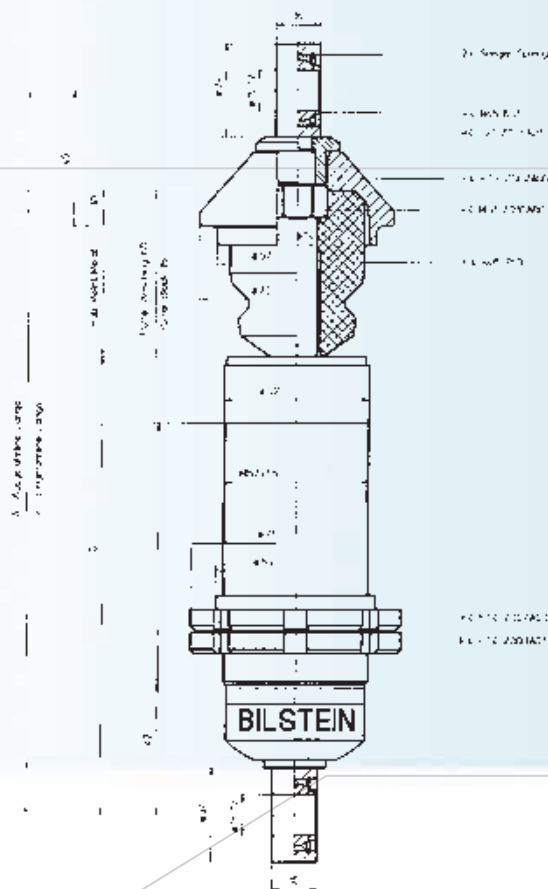

Overview of standard measurements

Type	Standard tubes		Standard piston rods	Overall length	Maximum damping forces	
	Ø outer	Ø inner	Rod diameter	Maximum extended	V=0.524 m/s	
	mm				Rebound (N)	Compression (N)
B 22	Ø 25	Ø 22	8	400	1.500	1.000

Motor sports suspensions

Height-adjustable spring-supported high-performance shock absorber.

- Steel or hard-coated aluminium damper tubes available for delivery
- Aluminium models have 30% higher heat conductivity with extremely low weight and outstanding service life
- Individual setting adapted for the application in consultation with the customer
- Installation and function in all mounting positions
- Height adjustment in built-in condition
- High performance reserves and extreme sturdiness

(Special models built on request)

Dimensions in mm

Motor sports Modular Damper System MDS.

Motor sports MDS

- Individual damping characteristic
- Configurable adjustment range
- 10 well defined clicks
- Low hysteresis
- Low friction
- Perfect reproducibility
- Easy to handle
- Configurable standard dimensions
- Customer dimensions on request

MDS, 1-Way

- One adjuster
- Combined Compression-/Rebound adjustment

MDS, 2-Way

- Two adjuster
- Independent Compression-/Rebound adjustment

Motor sports Modular Damper System MDS.

2-way MDS adjuster optimised for ease of use

- Adjustment wheels – numbered from 1 (soft) to 10 (hard)
- 10 positions clearly marked to ensure accuracy when clicking in
- Red rebound
- Blue bump
- Easy-to-read click setting
- Can be adjusted easily by hand
- No tool required for adjustment
- Directions of rotation cannot be mixed up

2-way MDS shock absorber optimised for ideal performance

- Mono-tube shock absorber for maximum piston diameter
- High damping power – optimum heat dissipation
- Light in weight – no external tank
- Low damping force hysteresis – minimum oil content
- Low susceptibility to failure – no external components

2-way MDS shock absorber optimised for ease of use

- Springs can be replaced quickly simply by removing the spring retainer
- Bump stop can be replaced quickly simply by removing and replacing the adjuster head

Current certificates for download

All of the current certificates can be called up in the pdf format in the internet under <http://katalog.bilstein.de>.

1. After loading the web page, insert the part number into the “look up box” eg. 48-080347.

2. When the part number appears click on it.

3. Select “certificate” and a PDF document will appear. Please note you will need to have Adobe Acrobat Reader® installed on your system to display the PDF.

Notes and explanations.

In cases of doubt please contact your local BILSTEIN dealer or our sales department before conversion.

BILSTEIN shock absorbers must always be replaced in pairs. The conversion requires special tools and expert knowledge. Therefore, converting your vehicle to BILSTEIN must be carried out by a specialist workshop. Use a chassis hoist for the fitting so that the raised vehicle cannot slip. If a chassis hoist is not available, you must ensure that the vehicle is blocked against any movement when it is raised. Under no circumstances should any work be completed underneath the vehicle if it is not adequately secured. Otherwise, there is a risk of extremely serious head injuries and contusions.

The application must be in accordance with the BILSTEIN type list, otherwise the proper function of the BILSTEIN gas pressure shock absorber is no longer guaranteed. The same goes for clamping a shock absorber in a vice or any similar tool.

Under no circumstances may this BILSTEIN gas pressure shock absorber be modified in any way, otherwise all warranty claims and the type homologation will be rendered invalid. The oil fill in a BILSTEIN gas pressure shock absorber is pretensioned with gas.

Opening or heating the shock absorber in contravention of this instruction can result in severe injuries to the hands and face. Do not use impact drivers for unscrewing and tightening the nuts, otherwise the fastening thread will be irreparably damaged.

Self-locking nuts are only allowed to be used once! Suspension springs are pretensioned! For safety reasons, the suspension spring must be pretensioned with the help of an appropriate spring tensioning device. The top mount is only to be removed when the spring is preloaded sufficiently so it can be moved by hand. Severe injuries to the head or upper body may occur if these warnings are disregarded.

All fixing mounts for struts must be tightened before the vehicle is let down to the ground. Ensure that the bump stop and dust cover are correctly and properly fastened.

Re-use any original equipment parts only if they are in good condition, otherwise replace them with new ones. Never remove the thin film of oil on the piston rod and seal. After the conversion, check and/or adjust the track and camber and, if necessary, the brake power control (load-dependent) and ABS sensors according to the manufacturer's data. Also check and adjust the headlight setting if necessary.

Observe the rules specified in the type list when disposing of old parts. If you have any questions about this, please contact our sales department or, for Germany only, PARTSLIFE Recycling System GmbH.

General information BILSTEIN B10 – B16

It is essential to observe the instructions in the expert report and in the installation instructions for chassis before installation. When chassis have a parts report, correct installation of the parts must be confirmed by an expert (TÜV, DEKRA, motor vehicle expert). The specified lowering dimension depends on the engine and equipment of the vehicle, and cannot be guaranteed. The specified lowering data result from the parts report. In the case of threaded suspension systems, the lowest permitted spring collar position must be set for acceptance in accordance with section 19 of the German Road Traffic Regulations. Spring collar positions outside the standard adjustment range must be presented for repeat acceptance by the official body (e.g. TÜV) in accordance with section 21 of the German Road Traffic Regulations. The report must be used as the basis for checking whether, and for which, wheel/tyre combinations it is necessary to have spacer discs.

Disposal of used parts BILSTEIN gas pressure shock absorbers

BILSTEIN mono-tube and twin-tube shock absorbers should not simply be thrown away. According to accident prevention and environment regulations, it is absolutely essential to depressurise the shock absorber and properly dispose of its content and its individual parts (danger of explosion when heating over 200 °C). Safety glasses according to DIN standard 58211 part 2 – as used when grinding – are to be worn in accordance with the following disposal procedures.

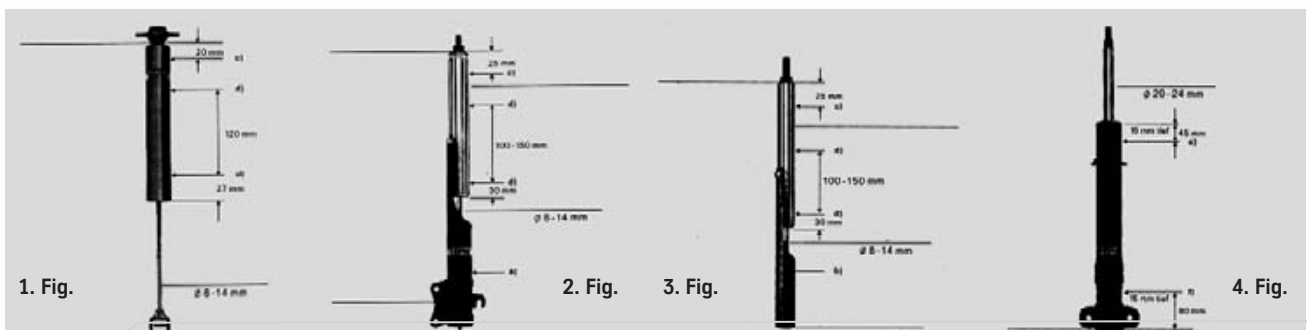

Disposal:

Illustrations 1-3:

BILSTEIN mono-tube gas pressure shock absorbers with a piston rod diameter of 8-14 mm (remove mounting parts, protective tube or dirt shield) are to be fixed on a suitable base, e.g. in a prism and centre marked at the 3 points to be drilled according to drawing no. 1. First of all, holes are to be drilled in the shock absorber close to the shock absorber base (c) with a 5 mm drill bit so that the hydrogen gas (pressure up to 25 bar) can escape. Two holes are now to be drilled at distance (d) in order to enable oil drainage. Proceed in the same manner when dismantling BILSTEIN mono-tube struts according to drawing no. 2. First of all remove the outer tube. Saw off the tube above the mount (a) (fixture, axle stub, clip) but not the piston rod. Remove burrs from the separated parts. Remove tube by pulling it over the chrome-plated tube. Proceed in the same manner with BILSTEIN cartridge inserts according to drawing no. 3. First of all remove outer tube. Grip the tube at point (b), turn (stud pointing downwards) and knock heavily against a hard base until the tube falls out of the tube bottom. Remove tube by pulling it over the chrome-plated tube. The details listed in the drawings are to be strictly adhered to.

Illustration 4:

BILSTEIN twin-tube gas pressure shock absorbers with a piston rod diameter of 20-24 mm (remove mounting parts, protective tube and dirt shield) are to be fixed on a suitable base, e.g. in a prism and centre marked at the 2 points to be drilled according to drawing no. 4. First of all drill a hole in the shock absorber close to the piston rod seal with a 5 mm drill bit so that the hydrogen gas can escape (e), then drill a 15 mm deep hole at the point stated (f) (80 mm from bottom of the tube with the piston rod in the extended position) in order to enable oil drainage. By repeated movement of the piston rod the oil is pumped out of the damper tube and collected in an appropriate container. The shock absorber oil, free from PCB and PCT, is to be disposed of in accordance with national waste disposal laws (same regulations apply to motor oil). After the shock absorbers have been depressurised and the oil drained off, shock absorber struts, cartridge inserts and their individual parts – still partly covered with oil and grease – must also be disposed of in accordance with the national waste disposal law. This information has been provided in good faith, subject to the applicable regulations. We cannot accept liability for each individual circumstance. If in doubt, please contact the Sales Consulting department of ThyssenKrupp Bilstein GmbH or the Company PARTSLIFE Recycling System GmbH & Co. KG
